PRESS RELEASE

Moving towards the goal of 100% electrification–CORE

Taking forward the ambitious goal of 100% electrification of Broad Gauge Route by December 2023 set by Government of India, the Guwahati Project Unit of Central Organization for Railway Electrification Prayagraj has commissioned the electrification works of **Senchoa Junction-Silghat Town (60.72 RKM)** section of Lumding Division of N.F. Railway on 16/12/2022.

With the electrification of the **Senchoa Junction-Silghat Town** rail section, trains will now be operated by electric engines between **Guwahati and Silghat Town**, which will increase the average speed. Dependence on diesel engine will be less, import duty will come down which will help in reducing the financial burden of Indian economy.

Central Organization for Railway Electrification is playing an extremely important role in making Indian Railways a Green Railway with emphasis on reducing Carbon Emission and dependence on imported fuel thereby saving precious foreign exchange.

General Manager CORE Shri. Pramod Kumar congratulated all the officers and employees on this achievement of the Guwahati project and expressed happiness that CORE is continuously moving towards the goal of 100 percent electrification of broad gauge routes.
